

EFFECTE IGA

In a services-driven world that's increasingly digital and intelligent, where compliance is non-negotiable, Efecte IGA is the perfect tool for automated and compliant Identity Governance and Administration. Efecte IGA provides organizations with pre-built automations, real-time governance capabilities, and user self-service for identity and access requests. Helping organizations to save costs, improve experiences, and operate safely.

Govern, automate, and protect identities with an agile European IAM

AUTOMATED WORKFLOWS

Improve your teams' working methods by incorporating automations to decrease the number of manual actions and time used.

ENTERPRISE PLATFORM

Every department needs identity management and access rights, so choose a solution that can incorporate data and services from all areas of your business to reduce systems and complexity.

USER-FOCUSED FEATURES

Simplify configurations using our Admin UI, eliminating the need for coding expertise. Delegate administration responsibilities and receive alerts when provisioning, integration, or workflow exceptions are detected.

OPERATIONAL EFFICIENCY

Centralizing your organization's identity and access related data and improve insights using list views, mass editing capabilities, task prioritization, and dashboards for critical measurements.

Keski-SOTE
Uudenmaan

tiera

"We have about 4,000 permanent employees and about 1,000 part-time employees meaning there are just over 5,000 active identities within the scope of access control. Even if we are talking about just workstation IDs, this is a large number of managed IDs. The savings are easy to calculate if you consider that it would take 15 minutes to create one ID manually."

Benita Kapp, ICT Development Manager, Keusote

Digitalize IAM Services

Centralize enterprise information and assets into a single platform to streamline approvals and user requests.

User Lifecycle Management

Simplify complex processes such as on-boarding, recertification, and managing temporary or external users.

Advanced Provisioning & Automation

Improve speed, flexibility and reduce errors with drag-and-drop workflows, dashboards, AI, and RPA.

Simplified Governance

Use visual reports, dashboards and automated alerts to ensure compliance 24/7 and streamline audits.

IAM Administration

Simplify day-to-day admin task management using a solution built using IAM best practices and regulations.

Secure Authentication

Create a central point for authentication and authorization, including support for guest or fully anonymous access.

Choose a system that meets your needs

EFFECTE IGA STARTER

Essential use cases, reports & more pre-packaged for quick deployment
